FASA ARM

Machine type	rotary
Output[1] , bricks/min	20 - 80
Output control	step-less
Dosing range[2] , g	9 – 1000
Batch	volumetric
Wrapping material	aluminum foil laminates, parchment paper
Roll external diameter, mm	up to 400
Roll width, mm	85 - 275
Roll bushing diameter, mm	70
Thickness, mm	0,05-0,08
Weight of parchment paper, g/m²	55±5%
Rated power input[3] , kW	1,5 - 2,2
Voltage, V	220/380
Frequency, Hz	50 - 60

Dimensions , mm

Additional ARM Options:
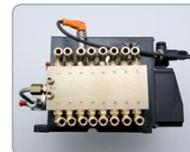

Safety Cover for the machine

Butter filling and wrapping machine will have a stainless steel frame and polycarbonate panels to cover the main body of the machine excluding the hopper.

The frame has a locking system – when the machine is running, the doors are locked automatically. Only when machine is stopped the doors can be opened.
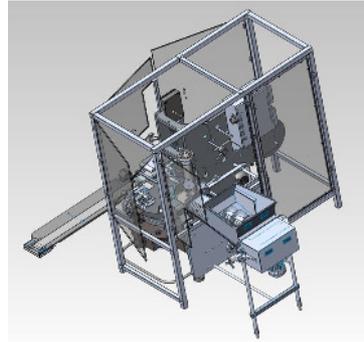

Automatic Lubrication System

The system will have a central SKF oil feeding station with tubes to 25 oiling points of the machine. 5 points will stay manual due to their location.

PLC screen

Siemens PLC touch screen control available instead of Enda potentiometer.

Stainless steel inserts for windows in the table

All windows in the table where packing function is performed will have stainless steel inserts for the walls with plastic bottoms.

Hopper protection sensor

Once the protection bar around the hopper is pushed down, it automatically stops the augers.

Hopper cover

Polycarbonate cover of hopper used during running of machine for hygiene and protection.

Packaging material disinfection lamp

UV lamp disinfects the packaging material before filling.
